ACADEMIC PROJECTS

Portfolio Builder   **Spring 2020**
GoHAMDev, Freelance

A content management system where users can sign up and build an online portfolio in minutes
- Created a user friendly sign in and sign up form to authenticate users to the app using firebase
- Utilized handlebars to ease the process of creating html templates based on JSON data
- Implemented a form page which consist of file uploads and basic user information that persists with the associated user

Bamazon   **Spring 2019**
University of Texas, The Coding Boot Camp

Utilizing a combination of MySQL and node, this app will take in orders from customers and deplete stock from the Bamazon
store's inventory
- Customers get to select a stock to buy with the desired amount and the total will be displayed
- Managers can log in and view products for sale, low inventory and add new product

Liri-Bot   **Spring 2019**
University of Texas, The Coding Boot Camp

Similar to Apple's popular Siri, Liri receives commands as your personal DJ, movie and concert assistant.
- This app operates through usage of Node CLI to input your commands to return the results
- Implemented OMDB, Bands in Town, and Spotify APIs

SQL Experience   **Fall 2018**
University of Houston, MIS 3376: Business Applications of Database Management I
- Created relational databases and retrieved information using Query Methods
